

COVID POLICY UPDATE EFFECTIVE 9/25/20

I was on a Regional Department of Health call yesterday and the discussion led to the following guidance changes:

Residents no longer need to be quarantined after medical appointments as long as the resident and the medical provider are wearing masks during the visit.

If a resident has more than 3 appointments a week, the recommendation is that the resident should be quarantined for 14 days.

This applies to medically necessary appointments only.

Please call me with any questions
