

Friends Home COVID update 9/10/20

I am very happy to be able to report Linden Hall has returned to the GREEN PHASE at 11:30 today.

Our last case of COVID in the building was 8/27/20. All residents and involved staff were tested and everyone's test results were negative for COVID. This is a true testament to the importance of everyone wearing a mask at all times because this is the only way at this time to control the virus.

GREEN: We are recommending all residents wear a mask when they are around other staff and/or residents. Residents will eat in the dining room maintaining 6 feet apart, can be out of their rooms at all times and engage in group activities of 5 or less and maintaining 6 feet apart. Outside visitation allowed with all visitors wearing a mask and maintaining 6 feet away from all residents and other visitors.

Please be aware that this status may change as a result of our active COVID status and the resulting regulatory requirements

. As always thank you all for your cooperation, patience and understanding during this very uncertain time.

Any questions please feel free to reach out to me at 610-444-2577 ext 202 Christine McDonald ED
