

**FRIENDS HOME IN KENNETT
COVID UPDATE 10/4/2021**

LINDEN HALL IS RED

FRIENDS HOME IS GREEN

A vaccinated caregiver had a positive rapid test this morning and she was sent to get a PCR test this afternoon.

All residents were tested via the rapid test and are negative.

All staff that have been tested are negative and the remaining staff will be tested prior to starting their shifts.

We will be testing everyone again in 3 days or sooner if any symptoms develop.

At this time, we are closing the Linden Hall dining room and only allowing outdoor visits until either the staff member's PCR test is negative or 10/18/21 which is 14 days from her positive test.

Communication will be updated regularly.

I am in contact with Omnicare to receive the booster shots here at Friends Home in Kennett. They will not hold a clinic, but our nurses can administer the booster. I will provide more information as it is available.

The yearly flu vaccine clinic is 10/13/21 from 7-3 here at Friends Home.

I am sorry for this update, but I am hopeful that it is contained, and we can resume normal operations as soon as possible.

As always please reach out with any questions or concerns.

Thank you!

Christine McDonald, Executive Director – (610) 444-2577 extension 202
