

FRIENDS HOME IN KENNETT
COVID UPDATE 1/24/2022 (Revised 4:30 p.m.)

**Both the Friends Home Building and Linden Hall
are RED**

Linden Hall: The original 3 residents who were positive last week are doing well but still testing positive. There was another LH resident who tested positive today. **RED** status will continue. Since last week's report, there are no new positive staff members in Linden Hall.

Friends Home: This morning a staff member tested positive after working among residents for several hours. Friends Home went into **RED** status (see previous 1/24/2022 update). All residents were tested and are negative. One additional staff member tested positive and was also sent home. Friends Home will continue under the **RED** status until further notice. All residents will be tested again in a few days or sooner if medically necessary. Residents are able to leave the building.

The present goal is to minimize resident to resident and employee to resident interaction as much as possible until this outbreak is resolved. Group dining, group activities and visitation are on hold until we get all clear from our infectious disease nurse.

As always please reach out with any questions or concerns.

Thank you!

Christine McDonald
